

## WHO GETS THE CASH?

Every \$14,000 Dumping Scow  
Earns \$6,338 Annually.

But the Barney Boat Company De-  
clares It Makes Nothing.

A Twelve Years a \$14,000 Boat  
Would Realize \$75,000.

A patent Barney dumping scow, such  
as is rented by the Street-Cleaning De-  
partment, costs \$14,000 to manufacture  
and put in operation.

The city of Buffalo builds its own  
scows and pays the Barney Dumping-  
Boat Company a royalty of \$50 per year,  
or \$150 per day, for each scow.

The city of Boston pays \$12.50 per day  
for the rental of a Barney scow, and the  
city pays for all repairs, supplies and  
other expenses of maintenance.

The city of New York pays \$25.50 per  
day for the rental of a Barney scow, the  
Barney Company paying for all repairs,  
supplies and other expenses of main-  
tenance.

Now let us see "where we are at."  
"The Evening World" in exposing the  
jobs, schemes, wastes and "divvies" in  
the city Street-Cleaning Department  
touched upon the matter of scows the  
other day, and showed that during the  
administration of "Big Tom" Brennan,  
the city paid the Barney Dumping-Boat  
Company the sum of \$10,000 for the use  
of a dozen scows.

It was further shown that on the first  
of this year Commissioner Brennan  
indulged himself in a business profitable  
to the Barney Company from \$16 a day to \$25  
a day for each scow rented by the city,  
and that he paid the sum of \$25.50 per  
day each being paid for the rental of  
these dumping boats.

Information shown by "The  
Evening World" that while the city of  
New York paid \$25.50 per day for the  
rental of a Barney scow, the city of  
Boston only pays the Barney Com-  
pany \$12.50 each per day for the rental  
of a scow.

Upon information given by De Witt C.  
Lins, Secretary and Treasurer of the  
Barney Dumping-Boat Company, it was  
stated that the Company was compelled  
to charge \$25.50 per day for each scow  
in order to make the business profitable,  
as the Company had only paid \$12.50  
per day in dividends in eleven years.

Whereas Walter Stinson, dry-goods,  
35 Worth street, and Ralph L. Cutler,  
dry-goods, 115 Worth street, two of the  
directors of the Barney Dumping-Boat  
Company, called at the office of "The  
Evening World" and in substantiation of  
Secretary Lins's statements offered to  
show the books and ledgers of the Bar-  
ney Dumping-Boat Company to any  
"Evening World" representative, and  
thereby prove "by the books" that there  
was very little, if any, profit to the  
Barney Company's dealings with the city.

"The Evening World" reporter kept  
his part of the contract and called at  
the office of the Barney Company, at  
219 Broadway, yesterday afternoon, and  
met by appointment Director Stanton.  
Director Stanton, who has been in the  
city for some time, said that he had  
only divided \$50,000 among the stockholders.

These dividends on the Barney dump-  
ing boats cost the city a great deal of  
money. The boat can deliver at sea in all  
weather, and is a very economical service. We  
have stated how small our profits have been,  
and how much the city has paid for the  
rental of these boats.

"In reality," said Director Cutler, "the  
city is really paying for the use of each  
of our scows, pays the salaries of em-  
ployees, telephone bills, rent, postage, in-  
surance and incidentals make up a  
large amount."

"The cost of repairs on our boats is  
something enormous. Take the last  
three years for example. In 1891 it cost  
us \$25,000 to repair the boats. In 1892 it cost  
us \$25,000, and in 1893 it cost us \$25,000.  
Now that is \$75,000 for repairs on the  
boats in three years."

"Then we pay \$14 a day for labor and  
15 cents for fuel supplies and \$2.50 for  
a day for insurance on each boat. This  
makes \$75 a day we pay out on each  
boat, and we have not included all our  
other expenses, such as rent, office sup-  
plies, telephone bills, salaries of clerks,  
postage and incidentals."

"Add all this to what Boston pays,  
\$12.50 for each boat, and you will find  
that the city of New York is paying for the  
rental of these boats at a rate of \$25.50  
per day for each boat."

"Mr. Cutler drew a long breath of satis-  
faction as he concluded.  
"Will you please give me the figures  
for repairs for the last three years prior  
to 1891?" asked "The Evening World" re-  
presentative. "I notice on your books in  
the \$25,000 expenses for 1891 two hundred  
and one for \$100 and one for \$100. It  
seems that after your boats have been  
nearly worn out, after six or eight  
years of service, you were compelled to  
practically rebuild two of them at a  
cost of \$100 and \$100."

"Now it would be only right to give me  
your figures for money spent on repairs  
prior to 1891. In order to get a fair  
comparison for ten years. There on your  
books, for instance, the repairs for 1890  
only cost \$100."

"The ledger was closed  
with a bang.  
"If 'The Evening World' cannot take  
my word for it you can go to thunder.  
We do not propose to show our books  
and tell the public all about our busi-  
ness," said Mr. Cutler, with much  
warmth.

"But this inspection of your books is  
your own suggestion, and I am here to  
your request," said the reporter.  
But there was no other way to be  
obtained. Mr. Stanton and Mr. Cutler  
positively refused to give the cost  
of repairs on scows used by the city of  
New York from 1881 to 1891.

As an actual fact the annual repairs  
on these dumping boats will not average  
over \$700 per year for each boat. Upon  
thirteen boats this would amount to  
\$9,100 a year, the expense of the boats  
employed, being two men at \$2 a day for  
each boat, amounts to \$1,400 per year, or  
\$1,400 on the thirteen boats. The cost  
of insurance is \$50 a year on each boat  
and supplies \$150 a year. So something  
like this:

Cost of operating thirteen scows:  
Labor, \$1,400  
Insurance, \$1,400  
Supplies, \$1,400  
Total, \$4,200

Now, at the rate the city of New York  
is paying for the use of these thirteen  
scows, \$25.50 each per day—the aggregate  
amount paid to the Barney Dumping-Boat  
Company for one year would be \$116,325.

This is very plain arithmetic:  
The city pays for rental, \$116,325.45  
Operating expenses, \$4,200.00  
Net profit, \$112,125.45

The thirteen scows of the Barney Com-  
pany under the present arrangement with  
the Street-Cleaning Department earn  
net profit of \$112,125.45 a year, or \$6,338.75  
a day from each boat.

This is a very handsome annual re-  
turn—\$6,338.75 on an investment of \$14,000,  
which is the cost for building a Barney  
scow.

One of the scows, with proper usage,  
will continue to work for twelve years.  
In each investment, therefore, of \$14,000  
in a Barney scow will bring cash re-  
turn of \$75,000.

This is equal to "Big Tom" Brennan's  
investment in ash-car horses at \$250  
each.

It is to be regretted that the Barney  
Dumping-Boat Company has lost money  
in its transactions with the city, and  
that it has only declared dividends of  
\$12.50 in eleven years.

Mr. Winkler's statement was in an un-  
biased manner for children and teaching, 25c.

## BROOKLYN CHURCH BURNED.

New England Congregational En-  
tirely Guttered This Morning.

One of the Oldest Sacred Edifices  
in Brooklyn.

The New England Congregational  
Church, 179 to 182 South Ninth street,  
Williamsburg, was entirely gutted by  
fire this morning.

Only the walls remain standing. The  
loss will probably amount to \$15,000.  
The flames spread to the dwelling-  
houses at 177 and 181, on either side, and  
were extinguished before any great dam-  
age was done.

It is believed that the fire was caused  
by the old-fashioned heating apparatus  
employed in the church.

The church was dedicated in 1831, and  
was one of the oldest in Brooklyn. Its  
first pastor was Rev. Thomas K.  
Beecher, brother of the famous Plym-  
outh Church orator, Henry Ward  
Beecher.

SEVENTH'S NEW CHAPLAIN.

Rev. Dr. David H. Greer, of St. Bar-  
tholomew's, Succeeds Dr. Paxton.

Rev. Dr. David Hammel Greer, of St.  
Bartholomew's Church, has been selected  
by Col. Dan Appleton for chaplain of  
the Seventh Regiment to succeed Rev.  
John R. Paxton, who recently resigned.

Dr. Greer is forty-nine years old, hav-  
ing been born at Wheeling, W. Va.,  
March 20, 1844. He was graduated from  
the University of Chicago in 1862, studied  
theology at Gambier Seminary, Ohio. He  
was ordained in 1868 at Alexandria, and  
became rector of Trinity Church, Covington,  
Ky., then of Christ Church, Clarksville,  
W. Va. In 1871 he went abroad, re-  
turning to become rector of Grace  
Church, Providence.

In 1888 he went to the rectorate of St.  
Bartholomew's parish. He is an eloquent  
and forceful extemporaneous speaker, a  
brilliant talker and a magnetic man.  
He is known as a broad churchman,  
liberal and progressive.

In Providence Dr. Greer organized sev-  
eral missions and founded St. Elizabeth's  
Home for Incurables in 1882. He was  
diocesan deputy to four general  
conventions.

DR. MEYER WANTED IN TOLEDO.

May Be Taken There for Trial If Not  
Convicted Here.

(By Associated Press.)  
TOLEDO, O., Dec. 22.—Should Dr.  
Meyer escape the clutches of the law in  
New York, he will undoubtedly be  
brought to Toledo for trial. Chief of Po-  
lice Raitz says he will secure requisition  
papers and be on hand at the January  
term of court in New York, ready to ar-  
rest the prisoner in case of an acquittal  
or a failure to secure a jury.

Meyer's alleged last victim, an un-  
known woman from Indianapolis, is said  
to have been poisoned here last Spring.  
She was in custody at Meyer's wife and  
investigation Meyer and his wife fled  
after the insurance companies started an  
action to recover.

Chief Raitz's plan is to prosecute him  
for horse-stealing and procure enough  
evidence to convict him for murder, while  
he is serving sentence for the lesser crime.

FOR NEW YORK'S MUSEUM.

Skeletons of Four Mammoth Ani-  
mals Coming from Wyoming.

(By Associated Press.)  
CHEYENNE, Wyo., Dec. 22.—J. W.  
Gordley, who has been hunting fossils in  
the Wyoming Bad Lands for six  
months, has secured enough material to  
restore the skeletons of at least four  
different animals of mammoth propor-  
tions.

They will be fitted up and placed on  
exhibition in the American Museum of  
Natural History in New York.
